

THE LIVELY WORLD of **LICHEN**

WHAT ARE LICHEN?

Pronounced
LIE-KIN

Lichen are not plants or even a single organism, they are a composite organism made of algae or cyanobacteria and fungus filaments.

WHERE CAN LICHEN BE FOUND?

In Michigan three main types are common, Foliose Lichen, Crustose Lichen, and Fruticose Lichen. Lichen can be found on trees, stone, or deadwood.
